

FLORIDA AGRICULTURAL AND MECHANICAL UNIVERSITY

OVERVIEW

The mission of the School of Business and Industry (SBI) is to produce graduates capable of excelling as future leaders in global businesses and industries. Founded in 1974, by Business Educator/Visionary Dr. Sybil C. Mobley, the world-renowned School of Business and Industry is home to faculty, staff and a diverse student body from all parts of the world. SBI strives to maintain its recognition nationally and internationally as a preeminent center of academic excellence in business. The work and learning environment is based on academics, professionalism, research, service, ethics and respect.

SBI students are the global leaders of tomorrow. They participate in many international experiences through corporate internships and study abroad opportunities. Some countries where SBI students have interned or participated in study abroad opportunities are Chile, China, Ghana, Dominican Republic and Brazil.

ACCOUNTING AND FINANCE

The Accounting and Finance Department is responsible for producing accountants and finance graduates who are capable of excelling as future leaders in global business, industry and commerce. The department provides an innovative academic, professional development, and internship experiences in an enlightened, ethical and stimulating student-centered environment.

OFFICE OF STUDENT SUCCESS AND ANALYTICS

The Office of Student Success strives to provide the highest quality of support via academic advisement and retention programming that facilitates student success throughout undergraduate, professional and graduate programs to ensure timely progression to degree.

OFFICE OF CAREER DEVELOPMENT

The Office of Career Development is responsible for managing the internship program, permanent placement of SBI's graduates and cultivating SBI's relationships with our Corporate Partners.

ECONOMICS AND PROFESSIONAL LEADERSHIP DEVELOPMENT

The Department of Economics is responsible for offering the degree programs in economics. The Professional Leadership Development Department is responsible for the development of business professionals with high degrees of communication skills, business sophistication and positive personal qualities. The PLD program consists of a series of planned activities, which stress confidence-building, oral and written communication, goal-setting, results orientation and time management. This program is facilitated through team activities in "student-run companies" and classroom settings.

INFORMATION SYSTEMS AND OPERATIONS MANAGEMENT

Recognizing how important technology has become, the Department of Information Systems and Operations Management provides the training and tools needed to give students the cutting-edge knowledge that will allow them to be successful in today's global marketplace.

SUPPLY CHAIN MANAGEMENT

Recognizing the demands of the growing field of Supply Chain Management, this program is committed to producing well-prepared and analytically competent graduates who will be able to rise to the level of skills and education necessary to respond to the increased complexities associated with logistics and supply chain networks. The program aims to facilitate high-quality learning by providing new-wave industry practices, and also the necessary skills to integrate supply chain management into effective business processes that move graduates rapidly into management positions.

MANAGEMENT AND MARKETING

The Department of Management and Marketing is committed to producing management and marketing graduates who are capable of excelling as future leaders in global business, industry and commerce.

FACILITIES MANAGEMENT

As the first accredited degree of its kind in the State of Florida, the Facilities Management (FM) program was conceptualized to offer a unique degree embodying cutting-edge business expertise paired with leading principles in architecture. FM is an interdisciplinary collaboration with the School of Business and Industry and the School of Architecture and Engineering Technology. As such, our graduates can effectively integrate both business acumen and discipline-specific technical knowledge, thus providing a competitive advantage to forward-thinking organizations that require high-quality talent in their FM functions.
